1- This picture shows the circulatory system. Which label is the hearts

a. Label 1

c. Label 3

b. Label 2

d. No correct answer

2- Which of the following is not part of the circulatory system?

a. Veins

c. The lungs

b. The heart

d. Arteries

3- What is the function of the circulatory system?

- a. It helps the body to move.
- b. It transports nutrients, water and oxygen around the body.
- c. It carries nervous impulses around the body.
- d. It filters waste products out from the blood.
- 4- When the heart pumps, it moves blood around the body. This is important because and need to be delivered to the body cells

a. oxygen, carbon dioxide

c. oxygen, food

b. food, waste products

d. food, carbon dioxide

5- Which of the following carries oxygen to the rest of the body?

a. White blood cells

c. Plasma

b. Red blood cells

d. Blood platelets

- a. Excreting wastes from the body
- b. Helping protect the body from disease
- c. Helping keep the body warm
- d. Transporting nutrients throughout the body

7- What is a function of blood?

- a. To carry carbon dioxide from the heart to the bladder
- b. To carry oxygen from the lungs to tissues in the body
- c. To carry oxygen from the digestive system to the heart
- d. No correct answer

8are the cells responsible	for carrying oxygen from the largs to	
body cells and carbon dioxide from body cells to the lungs.		
a. Red blood cells	c. Blood platelets	
b. White blood cells	d. Plasma	
9- The function of blood platelets is	s to	
a. carry blood components		
b. prevent bleeding and infec	tion when wounds are exposed to air	
c. defend the body against ge	rms & microbes
